

THE 4CS OF 21ST CENTURY LEARNING

POCKET
PEDAGOGY

WHAT ARE THEY?

In the age of the internet, knowledge is free and accessible anywhere, anytime. In light of this we should move away from teaching information and instead teach future-proof, soft skills.

The four skills outlined for this purpose are:

- Communication
- Collaboration
- Creativity
- Critical Thinking

WHY IS IT USEFUL?

In the coming decades, artificial intelligence will enable more and more jobs to be automated (done by computers). The 4Cs have been highlighted as human skills which will still be in high demand in the future.

WHAT DOES IT REALLY LOOK LIKE?

- Communication - build children's skills in this area by developing their speaking and listening abilities.
- Collaboration - use activities that get children to solve problems as a team.
- Creativity - use problems which have multiple solutions, and celebrate unorthodox thinking.
- Critical Thinking - encourage children to analyse writing critically and to highlight bias.
